Dear Resident

Canberra Crescent Village Green campaign

Thank you to those residents who have responded to my calls for evidence to create village greens in Meir Park. Having received advice, I believe that the best first step to secure the future of the green space off Canberra Crescent is to focus our efforts on this area. If successful, we can then look at other areas of Meir Park to replicate this work. Evidence already shared with me for other areas will be saved for this purpose.

We now need to build an evidence base for the Canberra Crescent land to support the Village Green application. With this letter is a survey to complete, along with two maps. If residents can help by completing the survey and confirming the maps are correct this will give us a good starting point. I have also uploaded this letter, the survey and maps to my website – www.abibrown.co.uk – if you would find it easier to complete online and email back to me.

You can also share with friends and family elsewhere on Meir Park who may be able to help with the evidence gathering. Remember – we are looking for evidence that this area has been used for at least the last 20 years.

I can collect completed surveys from residents or alternatively, you will find me near the green space on Canberra Crescent on **Monday 24th February from 8.45-9.30am** if you want to have a chat or collect more copies of the survey. I am also happy to collect surveys that morning in person or if you have left somewhere safe (please let me know via email abi.brown@stoke.gov.uk or phone 07793 844169 – leave a message or a text/WhatsApp).

The survey is lengthy but self-explanatory, and I am grateful to the Open Space Society for enabling me to use it. It has been used successfully in other areas and helps to ensure we

have the right evidence to support our Village Green application, including establishing who uses the area, how they use it and where they live. Please do your best to complete as much as possible, there is a blank page at the end for any further information you need to provide.

I will be continuing to work on this campaign over the summer and appreciate any support residents can provide in gathering evidence for the submission.

If you require any further information or need any further assistance, please do not hesitate to contact me on the details below.

Yours sincerely

Dear Resident

Canberra Crescent Village Green campaign

Thank you to those residents who have responded to my calls for evidence to create village greens in Meir Park. Having received advice, I believe that the best first step to secure the future of the green space off Canberra Crescent is to focus our efforts on this area. If successful, we can then look at other areas of Meir Park to replicate this work. Evidence already shared with me for other areas will be saved for this purpose.

We now need to build an evidence base for the Canberra Crescent land to support the Village Green application. With this letter is a survey to complete, along with two maps. If residents can help by completing the survey and confirming the maps are correct this will give us a good starting point. I have also uploaded this letter, the survey and maps to my website – www.abibrown.co.uk – if you would find it easier to complete online and email back to me.

You can also share with friends and family elsewhere on Meir Park who may be able to help with the evidence gathering. Remember – we are looking for evidence that this area has been used for at least the last 20 years.

I can collect completed surveys from residents or alternatively, you will find me near the green space on Canberra Crescent on **Monday 24th February from 8.45-9.30am** if you want to have a chat or collect more copies of the survey. I am also happy to collect surveys that morning in person or if you have left somewhere safe (please let me know via email abi.brown@stoke.gov.uk or phone 07793 844169 – leave a message or a text/WhatsApp).

The survey is lengthy but self-explanatory, and I am grateful to the Open Space Society for enabling me to use it. It has been used successfully in other areas and helps to ensure we

have the right evidence to support our Village Green application, including establishing who uses the area, how they use it and where they live. Please do your best to complete as much as possible, there is a blank page at the end for any further information you need to provide.

I will be continuing to work on this campaign over the summer and appreciate any support residents can provide in gathering evidence for the submission.

If you require any further information or need any further assistance, please do not hesitate to contact me on the details below.

Yours sincerely

Canberra Crescent Village Green campaign

Thank you to those residents who have responded to my calls for evidence to create village greens in Meir Park. Having received advice, I believe that the best first step to secure the future of the green space off Canberra Crescent is to focus our efforts on this area. If successful, we can then look at other areas of Meir Park to replicate this work. Evidence already shared with me for other areas will be saved for this purpose.

We now need to build an evidence base for the Canberra Crescent land to support the Village Green application. With this letter is a survey to complete, along with two maps. If residents can help by completing the survey and confirming the maps are correct this will give us a good starting point. I have also uploaded this letter, the survey and maps to my website – www.abibrown.co.uk – if you would find it easier to complete online and email back to me.

You can also share with friends and family elsewhere on Meir Park who may be able to help with the evidence gathering. Remember – we are looking for evidence that this area has been used for at least the last 20 years.

I can collect completed surveys from residents or alternatively, you will find me near the green space on Canberra Crescent on **Monday 24th February from 8.45-9.30am** if you want to have a chat or collect more copies of the survey. I am also happy to collect surveys that morning in person or if you have left somewhere safe (please let me know via email abi.brown@stoke.gov.uk or phone 07793 844169 – leave a message or a text/WhatsApp).

The survey is lengthy but self-explanatory, and I am grateful to the Open Space Society for enabling me to use it. It has been used successfully in other areas and helps to ensure we

have the right evidence to support our Village Green application, including establishing who uses the area, how they use it and where they live. Please do your best to complete as much as possible, there is a blank page at the end for any further information you need to provide.

I will be continuing to work on this campaign over the summer and appreciate any support residents can provide in gathering evidence for the submission.

If you require any further information or need any further assistance, please do not hesitate to contact me on the details below.

Yours sincerely

Thank you to those residents who have responded to my calls for evidence to create village greens in Meir Park. Having received advice, I believe that the best first step to secure the future of the green space off Canberra Crescent is to focus our efforts on this area. If successful, we can then look at other areas of Meir Park to replicate this work. Evidence already shared with me for other areas will be saved for this purpose.

We now need to build an evidence base for the Canberra Crescent land to support the Village Green application. With this letter is a survey to complete, along with two maps. If residents can help by completing the survey and confirming the maps are correct this will give us a good starting point. I have also uploaded this letter, the survey and maps to my website – www.abibrown.co.uk – if you would find it easier to complete online and email back to me.

You can also share with friends and family elsewhere on Meir Park who may be able to help with the evidence gathering. Remember – we are looking for evidence that this area has been used for at least the last 20 years.

I can collect completed surveys from residents or alternatively, you will find me near the green space on Canberra Crescent on **Monday 24th February from 8.45-9.30am** if you want to have a chat or collect more copies of the survey. I am also happy to collect surveys that morning in person or if you have left somewhere safe (please let me know via email abi.brown@stoke.gov.uk or phone 07793 844169 – leave a message or a text/WhatsApp).

The survey is lengthy but self-explanatory, and I am grateful to the Open Space Society for enabling me to use it. It has been used successfully in other areas and helps to ensure we

have the right evidence to support our Village Green application, including establishing who uses the area, how they use it and where they live. Please do your best to complete as much as possible, there is a blank page at the end for any further information you need to provide.

I will be continuing to work on this campaign over the summer and appreciate any support residents can provide in gathering evidence for the submission.

If you require any further information or need any further assistance, please do not hesitate to contact me on the details below.

Thank you to those residents who have responded to my calls for evidence to create village greens in Meir Park. Having received advice, I believe that the best first step to secure the future of the green space off Canberra Crescent is to focus our efforts on this area. If successful, we can then look at other areas of Meir Park to replicate this work. Evidence already shared with me for other areas will be saved for this purpose.

We now need to build an evidence base for the Canberra Crescent land to support the Village Green application. With this letter is a survey to complete, along with two maps. If residents can help by completing the survey and confirming the maps are correct this will give us a good starting point. I have also uploaded this letter, the survey and maps to my website – www.abibrown.co.uk – if you would find it easier to complete online and email back to me.

You can also share with friends and family elsewhere on Meir Park who may be able to help with the evidence gathering. Remember – we are looking for evidence that this area has been used for at least the last 20 years.

I can collect completed surveys from residents or alternatively, you will find me near the green space on Canberra Crescent on **Monday 24th February from 8.45-9.30am** if you want to have a chat or collect more copies of the survey. I am also happy to collect surveys that morning in person or if you have left somewhere safe (please let me know via email abi.brown@stoke.gov.uk or phone 07793 844169 – leave a message or a text/WhatsApp).

The survey is lengthy but self-explanatory, and I am grateful to the Open Space Society for enabling me to use it. It has been used successfully in other areas and helps to ensure we

have the right evidence to support our Village Green application, including establishing who uses the area, how they use it and where they live. Please do your best to complete as much as possible, there is a blank page at the end for any further information you need to provide.

I will be continuing to work on this campaign over the summer and appreciate any support residents can provide in gathering evidence for the submission.

If you require any further information or need any further assistance, please do not hesitate to contact me on the details below.
